Office Referral Policy

Certain health insurance policies require that you obtain a referral authorization from your Primary Care Physician (PCP) prior to receiving care from a specialist's office such as ours. It is the patient's responsibility to ensure that a valid referral is on file prior to the appointment. Please note that failure to obtain the necessary authorizations will require alternate payment arrangements or the rescheduling of your appointment.

Please be courteous to the Primary Care Physician (PCP) and request the referral early, as some of the offices require 3 to 7 days of advance notice. Also keep in mind referrals are subject to expire if not used within 30 days depending on the policy.

Please be aware that if you visit a specialist without a referral, depending on the insurance policy, you may become responsible for payment for all services rendered or for paying a deductible and coinsurance.

By signing this you acknowledge that you understand your responsibilities should you have an insurance policy that requires referrals.
